COMMISSION IMPLEMENTING REGULATION (EU) 2025/1926

of 22 September 2025

amending Annex I to Council Regulation (EEC) No 2658/87 on the tariff and statistical nomenclature and on the Common Customs Tariff

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Regulation (EEC) No 2658/87 of 23 July 1987 on the tariff and statistical nomenclature and on the Common Customs Tariff⁽¹⁾, and in particular Article 9(1) and Article 12 thereof,

Whereas:

- (1) Regulation (EEC) No 2658/87 established a goods nomenclature ('Combined Nomenclature' or 'CN') to meet, at one and the same time, the requirements of the Common Customs Tariff, the external trade statistics of the Union, and other Union policies concerning the importation or exportation of goods.
- (2) In the interests of legislative simplification, it is appropriate to modernise the CN and to adapt its structure.
- (3) It is necessary to amend the CN in order to take account of changes in requirements relating to statistics and to commercial policy and technological and commercial developments, by introducing new subheadings to facilitate monitoring of specific goods ('lithium nickel manganese cobalt oxides' and 'lithium iron phosphate' in Chapter 28, 'artificial graphite' and 'photovoltaic wafers' in Chapter 38, 'tubular wind turbine steel towers and tower sections' in Chapter 73, 'rotors and stators for hydraulic turbines' and 'wind turbine blades' in Chapter 84, 'hydrogen fuel cell generators', 'inverters with maximum power point tracking functionality', 'separators of plastic film' and 'assemblies of stacked galvanic cells' in Chapter 85 of the CN).
- (4) Considering the recommendations by the World Customs Organization, it is appropriate to introduce new subheadings in Chapter 29 of the CN.
- (5) In order to avoid possible misinterpretation, it is necessary to amend Additional note 2 to Chapter 3, supplementary unit for CN code 7019 19 00, description in subheading 7317 00 and CN code 8427 20 11 and to amend position of footnotes in subheadings 0407 19, 1005 10, 1518 00, 1601 00, 1602 31, 1602 32 and 1602 39 of the CN.
- (6) Considering that from the classification point of view, dichloroethylene cannot be considered a derivative of ethane, it is necessary to amend the classification of mixtures containing halogenated derivatives of ethylene or propylene in Annex 10 of the CN.
- (7) In the interest of clarity and simplification, it is necessary to amend the text of some footnotes in the CN.
- (8) With a view to securing uniformity of the classification rules in the CN with the interpretation and application of the Harmonized System adopted by the World Customs Organisation and in order to resolve existing classification divergencies in the EU, it is necessary to delete Additional note 1 to Chapter 95 of the CN. As this Additional note 1 concerns 'articles for Christmas festivities', this amendment should be applied as a matter of urgency.
- (9) With effect from 1 January 2026, Annex I to Regulation (EEC) No 2658/87 should be replaced by a complete and up-to-date version of the CN, together with the autonomous and conventional rates of duty resulting from measures adopted by the Council or by the Commission.

⁽¹⁾ OJ L 256, 7.9.1987, p. 1, ELI: <http://data.europa.eu/eli/reg/1987/2658/oj>.

(10) The measures provided for in this Regulation are in accordance with the opinion of the Customs Code Committee,

HAS ADOPTED THIS REGULATION:

Article 1

Regulation (EEC) No 2658/87 is amended as follows:

- (1) In Part Two, Section XX, Chapter 95 of Annex I, the additional note 1 is deleted.
- (2) Annex I to Regulation (EEC) No 2658/87 is replaced by the text set out in the Annex to this Regulation.

Article 2

This Regulation shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

Article 1, point (1) shall apply from 1 November 2025.

Article 1, point (2) shall apply from 1 January 2026.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 22 September 2025.

*For the Commission,
On behalf of the President,
Gerassimos THOMAS
Director-General
Directorate-General for Taxation and Customs Union*

PRELIMINARY PROVISIONS

SECTION I

GENERAL RULES

A. General rules for the interpretation of the Combined Nomenclature

Classification of goods in the Combined Nomenclature shall be governed by the following principles:

1. The titles of sections, chapters and sub-chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative section or chapter notes and, provided such headings or notes do not otherwise require, according to the following provisions.
2.
 - (a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this rule), presented unassembled or disassembled.
 - (b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of rule 3.
3. When, by application of rule 2(b) or for any other reason, goods are prima facie classifiable under two or more headings, classification shall be effected as follows:
 - (a) the heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods;
 - (b) mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3(a), shall be classified as if they consisted of the material or component which gives them their essential character, in so far as this criterion is applicable;
 - (c) when goods cannot be classified by reference to 3(a) or (b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.
4. Goods which cannot be classified in accordance with the above rules shall be classified under the heading appropriate to the goods to which they are most akin.
5. In addition to the foregoing provisions, the following rules shall apply in respect of the goods referred to therein:
 - (a) camera cases, musical instrument cases, gun cases, drawing-instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This rule does not, however, apply to containers which give the whole its essential character;

- (b) subject to the provisions of rule 5(a), packing materials and packing containers⁽¹⁾ presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.
6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading notes and, *mutatis mutandis*, to the above rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this rule, the relative section and chapter notes also apply, unless the context requires otherwise.

B. General rules concerning duties

1. The customs duties applicable to imported goods originating in countries which are Contracting Parties to the General Agreement on Tariffs and Trade or with which the European Union has concluded agreements containing the most-favoured-nation tariff clause shall be the conventional duties shown in column 3 of the schedule of duties. Unless the context requires otherwise, these conventional duties are applicable to goods, other than those referred to above, imported from any third country.

The conventional rates of duty reproduced in column 3 are applicable from 1 January 2026.

When autonomous rates of duty are lower than the conventional rates of duty, the autonomous duties, shown by means of a footnote, are applicable.

2. Paragraph 1 shall not apply where special autonomous customs duties are provided for in respect of goods originating in certain countries or where preferential customs duties are applicable in pursuance of agreements.
3. Paragraphs 1 and 2 shall not preclude the Member States from applying customs duties other than those of the Common Customs Tariff where the application of such other duties is justified by the law of the European Union.
4. The duties expressed as percentage rates are *ad valorem* duties.
5. The symbol 'EA' indicates that the goods concerned are chargeable with an 'agricultural component' fixed in accordance with Annex 1.
6. The symbol 'AD S/Z' or 'AD F/M' in Chapters 17 to 19 indicates that the maximum rate of duty consists of an *ad valorem* duty plus an additional duty for certain forms of sugar or for flour. This additional duty is fixed in accordance with the provisions of Annex 1.
7. In Chapter 22, the symbol '€ /% vol/hl' means that a specific duty, expressed in euro, is to be calculated for each percentage volume of alcohol per hectolitre. Thus, a beverage having an alcohol content by volume of 40 % is to be charged as follows:

— '€ 1/% vol/hl' = € 1 × 40, giving a duty of € 40 per hectolitre, or

— '€ 1/% vol/hl + € 5/hl' = € 1 × 40 plus € 5, giving a duty of € 45 per hectolitre.

Where, in addition, a minimum (MIN) value is shown, for example '€ 1,6/% vol/hl MIN € 9/hl', it means that the duty, calculated on the basis of the above rule, is to be compared with the minimum duty, for example '€ 9/hl', and the higher of the two is to be applied.

⁽¹⁾ The terms 'packing materials' and 'packing containers' mean any external or internal containers, holders, wrappings or supports other than transport devices (for example, transport containers), tarpaulins, tackle or ancillary transport equipment. The term 'packing containers' does not cover the containers referred to in general rule 5(a).

8. Where, in Chapters 17 to 19 and 21 a maximum (MAX) value is shown, for example '(9 + EA) MAX (24,2 + AD S/Z)', it means that the duty calculated by the addition of 9 % and the 'agricultural component' (EA) shall not exceed the sum of 24,2 % and the additional duty on sugar ('AD S/Z').

C. General rules applicable both to nomenclature and to duties

1. Unless provided otherwise, the provisions relating to customs value shall be applied to determine, in addition to the value for the assessment of *ad valorem* customs duties, the values by reference to which the scope of certain headings or subheadings is defined.
2. The dutiable weight, in the case of goods chargeable by weight, and the weights by reference to which the scope of certain headings or subheadings is defined, shall be taken to be:
 - (a) in the case of a reference to 'gross weight', the aggregate weight of the goods and of all the packing materials and packing containers;
 - (b) in the case of a reference to 'net weight' or simply to 'weight' without qualification, the weight of the goods themselves without packing materials and packing containers of any kind.
3. The equivalent in national currencies of the euro, for Member States other than participating Member States as defined in Council Regulation (EC) No 974/98 ⁽¹⁾ (hereafter called 'non-participating Member States'), shall be fixed in accordance with Article 53 of Regulation (EU) No 952/2013 ⁽²⁾ of the European Parliament and of the Council.
4. Goods eligible for favourable tariff treatment by reason of their end-use:

Where the import duty applicable under the end-use arrangements to goods for a specific end-use is not lower than that which would otherwise be applicable to the goods, the said goods shall be classified in the code referring to the end-use and Article 254 of Regulation (EU) No 952/2013 shall not apply.

SECTION II

SPECIAL PROVISIONS

A. Goods for certain categories of ships, boats and other vessels and for drilling or production platforms

1. Customs duties shall be suspended in respect of goods intended for incorporation in the ships, boats or other vessels listed in the following schedule, for the purposes of their construction, repair, maintenance or conversion, and in respect of goods intended for fitting to or equipping such ships, boats or other vessels.

2. Customs duties shall be suspended in respect of:

(a) goods intended for incorporation in drilling or production platforms:

(1) fixed, of subheading ex 8430 49, operating in or outside the territorial sea of Member States, or

(2) floating or submersible, of subheading 8905 20,

for the purposes of their construction, repair, maintenance or conversion, and in respect of goods intended for equipping the said platforms.

Those goods such as motor fuel, lubricants and gas, which are necessary for the operation of machines and apparatus which do not affect permanently, and are not integral parts of the platforms and which are used on board for the construction, repair, maintenance, conversion or equipping of these platforms are regarded also as being used for incorporation in drilling or production platforms;

(b) tubes, pipes, cables and their connection pieces, linking these drilling or production platforms to the mainland.

3. The suspensions shall be subject to conditions laid down in the relevant provisions of the European Union with a view to customs control of the use of such goods.

B. Civil aircraft and goods for use in civil aircraft

1. Relief from customs duty is provided for:
- civil aircraft,
 - certain goods for use in civil aircraft and for incorporation therein in the course of their manufacture, repair, maintenance, rebuilding, modification or conversion,
 - ground flying trainers and their parts, for civil use.

These goods are covered by headings and subheadings listed in tables in paragraph 5.

2. For the purposes of paragraph 1, first and second indent, 'civil aircraft' means aircraft other than aircraft used in military or similar services in the Member States which carry a military or non-civil registration.
3. For the purposes of paragraph 1, second indent, the expression 'for use in civil aircraft' shall include goods for use in ground flying trainers for civil use.
4. Relief from customs duties shall be subject to the conditions laid down in the relevant provisions of the European Union with a view to customs control of the use of such goods (see Article 254 of Regulation (EU) No 952/2013).

However, these conditions shall not apply in cases where civil aircraft falling under subheadings 8802 11, 8802 12, 8802 20, 8802 30, 8802 40 have been duly entered on a register of a Member State or a third country in accordance with the Convention on International Civil Aviation dated 7 December 1944 and reference is made in the customs declaration for release for free circulation to the relevant certificate of registration.

The provisions of the CN Preliminary Provisions, Section I – General Rules, point C. 4. shall apply *mutatis mutandis*.

5. Goods eligible for this relief from customs duties are covered by the following headings or subheadings:

3917 40, 4011 30, 4012 13, 4012 20, 7324 10, 7326 20, 8302 10, 8302 20, 8302 42, 8302 49, 8302 60, 8407 10, 8408 90, 8409 10, 8411, 8412 10, 8412 21, 8412 29, 8412 31, 8412 39, 8412 80 80, 8412 90, 8413 19, 8413 20, 8413 30, 8413 50, 8413 60, 8413 70, 8413 81, 8413 91, 8414 10, 8414 20, 8414 30, 8414 51, 8414 59, 8414 80, 8414 90, 8415 81, 8415 82, 8415 83, 8418 10, 8418 30, 8418 40, 8418 61, 8418 69, 8419 50, 8419 81, 8421 19, 8421 21, 8421 23, 8421 29, 8421 31, 8421 32, 8421 39, 8424 10, 8479 90, 8483 10, 8483 30, 8483 40, 8483 50, 8483 60, 8483 90, 8484 10, 8484 90, 8501 32, 8501 52, 8501 61, 8501 62, 8501 63, 8502, 8504 10, 8504 31, 8504 32, 8504 33, 8504 40, 8504 50, 8507, 8511 10, 8511 20, 8511 30, 8511 40, 8511 50, 8511 80, 8518 10, 8518 22, 8518 29, 8518 30, 8518 40, 8518 50, 8519 81, 8521 10, 8526, 8528 52, 8529 10, 8531 10 95, 8531 20, 8531 80, 8539 10, 8544 30, 8801, 8802 11, 8802 12, 8802 20, 8802 30, 8802 40, 8806 10, 8806 21, 8806 22, 8806 23, 8806 24, 8806 29, 8806 91, 8806 92, 8806 93, 8806 94, 8806 99, 8807 10, 8807 20, 8807 30, 8807 90, 9001 90, 9002 90, 9014 10, 9025, 9029 20 38, 9030 31, 9030 33, 9030 89, 9032, 9104.

For the following subheadings, relief from customs duties for products for use in civil aircraft is granted only for the goods described in the second column:

Subheading	Description
3917 21 90, 3917 22 90, 3917 23 90, 3917 29 00, 3917 31, 3917 33, 3917 39 00, 7413 00, 8307 10, 8307 90	With fittings attached
4008 29	Profile shapes, cut to size
4009 12, 4009 22, 4009 32, 4009 42	Suitable for conducting gases or liquids
3926 90, 4016 10, 4016 93, 4016 99	For technical uses
4504 90	Gaskets, washers and other seals
6812 80	Other than clothing, clothing accessories, footwear, headgear, paper, millboard, felt or compressed asbestos fibre jointing, in sheets or rolls
6812 99	Other than paper, millboard, felt; other than compressed asbestos fibre jointing, in sheets or rolls
6813 20, 6813 81, 6813 89	With a basis of asbestos or of other mineral substances
7007 21	Windshields, not framed
7322 90	Air heaters and hot-air distributors (excluding parts thereof)

7324 90	Sanitary ware (excluding parts thereof)
7608 10, 7608 20	With fittings attached, suitable for conducting gases or liquids
8108 90	Tubes and pipes, with fittings attached, suitable for conducting gases or liquids
8415 90	Of air-conditioning machines of subheading 8415 81, 8415 82 or 8415 83
8419 90	Parts of heat exchange units
8479 89	Hydropneumatic batteries; mechanical actuators for thrust reversers; toilet units specially designed; air humidifiers and dehumidifiers; servomechanisms, non-electric; non-electric starter motors; pneumatic starters for turbojets, turbopropellers and other gas turbines; windscreen wipers, non-electric; propeller regulators, non-electric
8501 20, 8501 40	Of an output exceeding 735 W but not exceeding 150 kW
8501 31	Of an output exceeding 735 W, DC generators
8501 33	Motors of an output not exceeding 150 kW and generators
8501 34	Generators, of an output exceeding 375 kW
8501 51	Of an output exceeding 735 W
8501 53	Of an output not exceeding 150 kW
8501 72	Of an output exceeding 735 W
8501 80	Of an output not exceeding 750 kW
8516 80 20	Assembled only with a simple insulated former and electrical connections, used for anti-icing or de-icing
8522 90	Assemblies and sub-assemblies consisting of two or more parts or pieces fastened or joined together, for apparatus of subheading 8519 81
8529 90	Assemblies and sub-assemblies consisting of two or more parts or pieces fastened or joined together, for apparatus of heading 8526
8536 70	Connectors of plastics for optical fibres, optical fibre bundles or cables
8543 70 90	Electric synchros and transducers; defrosters and demisters with electric resistors
9020 00	Excluding parts
9029 10	Electric or electronic revolution counters
9029 90	Of revolution counters, speed indicators and tachometers
9109 10, 9109 90	Of a width or diameter not exceeding 50 mm
9405 11, 9405 19, 9405 61, 9405 69	Of plastics or of base metal
9405 92, 9405 99	Of the articles of subheadings 9405 11, 9405 19, 9405 61 or 9405 69, of plastics or of base metal

6. The goods specified in paragraph 5 are integrated in TARIC by subheadings with a footnote reference in the following terms: 'Entry under this subheading is subject to the conditions laid down in the relevant provisions of the European Union (see Article 254 of Regulation (EU) No 952/2013)'.

However, for subheadings 8802 11, 8802 12, 8802 20, 8802 30, 8802 40, the footnote reference reads:

'Entry under this subheading is subject to the conditions laid down in the relevant provisions of the European Union (see Article 254 of Regulation (EU) No 952/2013). These conditions shall not apply in cases where civil aircraft have been duly entered on a register of a Member State or a third country in accordance with the Convention on International Civil Aviation dated 7 December 1944 and reference is made in the customs declaration for release for free circulation to the relevant certificate of registration.'

C. Pharmaceutical products

1. Relief from customs duty is provided for pharmaceutical products of the following categories:
 - (1) pharmaceutical substances which are covered by the CAS RN (chemical abstracts service registry numbers) and the international non-proprietary names (INNs) listed in Annex 3;
 - (2) salts, esters and hydrates of INNs which are described by combining INNs of Annex 3 with prefixes or suffixes of Annex 4, provided such products are classifiable in the same 6-digit HS-subheadings as the relevant INN;
 - (3) salts, esters and hydrates of INNs which are listed in Annex 5 and which are not classifiable in the same 6-digit HS-subheadings as the corresponding INNs;
 - (4) pharmaceutical intermediates, i.e. compounds of a kind used in the manufacture of finished pharmaceutical products which are covered by the CAS RN and the chemical names, listed in Annex 6.
2. Special cases:
 - (1) INNs cover only those substances described in the lists of recommended and proposed INNs published by the World Health Organisation (WHO). Where the number of substances covered by an INN is less than that covered by the CAS RN, only those substances covered by the INN will be subject to duty-free treatment;
 - (2) where a product of Annex 3 or Annex 6 is identified by a CAS RN corresponding to a specific isomer, only that isomer may qualify for duty-free treatment;
 - (3) double derivatives (salts, esters and hydrates) of INNs identified by a combination of an INN of Annex 3 with a prefix or suffix of Annex 4 qualify for duty-free treatment, provided they are classifiable in the same 6-digit HS-subheading as the relevant INN:

example: alanine methyl ester, hydrochloride;
 - (4) where an INN of Annex 3 is a salt (or an ester), no other salt (or ester) of the acid corresponding to the INN may qualify for duty-free treatment:

example: oxprenolate potassium (INN): duty-free

oxprenolate sodium: not duty-free.
 - (5) where no CAS RN is indicated for a product of Annex 3 or Annex 6 (number 0-00-0), the international non-proprietary name (INN) or listed chemical name is sufficient for duty-free treatment.

D. Standard rate of duty

1. Customs duty shall be charged at the flat rate of 2,5 % *ad valorem* on goods:

- contained in consignments sent by one private individual to another, or
- contained in travellers' personal luggage,

provided that such importations are not of a commercial nature.

This flat-rate 2,5 % customs duty shall apply, provided that the intrinsic value of the goods subject to import duty does not exceed € 700 per consignment or per traveller.

Such flat-rate assessment shall not apply to goods for which the rate of duty in the schedule of customs duties is 'free' and to goods of Chapter 24 which are contained in a consignment or in travellers' personal luggage in amounts exceeding those laid down in Article 27 or pursuant to Article 41 of Council Regulation (EC) No 1186/2009 of 16 November 2009 setting up a Community system of reliefs from customs duty ⁽¹⁾.

2. Importations shall be treated as not being of a commercial nature if:

- (a) in the case of goods contained in consignments sent by one private individual to another, such consignments:

- are of an occasional nature,
- contain goods exclusively for the personal use of the consignee or his family, which do not by their nature or quantity reflect any commercial interest,
- are sent to the consignee by the consignor free of payment of any kind;

- (b) in the case of goods contained in travellers' personal luggage, they:

- are of an occasional nature, and
- consist exclusively of goods for the personal use of the travellers or their families, or of goods intended as presents; the nature and quantity of such goods must not be such as might indicate that they are being imported for commercial reasons.

3. The flat rate of customs duty shall not apply to goods imported under the conditions set out in paragraphs 1 and 2 if the person entitled has, before the said flat rate is applied to them, requested that they be subject to the customs duties appropriate to them. All the goods making up the consignment shall then be subject to the import duties which are appropriate to them, without prejudice to the duty-free admission provided for pursuant to Articles 25 to 27 and 41 of Regulation (EC) No 1186/2009.

For the purposes of the first subparagraph, import duties shall mean both customs duties and charges having equivalent effect and other import charges provided for under the common agricultural policy or under specific arrangements applicable to certain goods resulting from the processing of agricultural products.

4. Non-participating Member States may round off the amount in national currencies resulting from the conversion of the sum of € 700.
5. Non-participating Member States may maintain unchanged the equivalent in national currency of the sum of € 700 if, at the time of the annual adjustment provided for in Article 53 of Regulation (EU) No 952/2013 the conversion of this amount, before the rounding off provided for in paragraph 4, results in a change of less than 5 % in the equivalent in national currency, or in a reduction thereof.

E. Containers and packing materials

The following provisions are applicable to the containers and packing materials referred to in general interpretative rule 5(a) and (b) and put into free circulation at the same time as the goods which they contain or with which they are presented.

1. When the containers and packing materials are classified with the goods in accordance with the provisions of general interpretative rule 5, they shall be:
 - (a) chargeable at the same rate of customs duty as the goods:
 - where such goods are subject to an *ad valorem* customs duty, or
 - where they are to be included in the dutiable weight of the goods;
 - (b) admitted free of customs duties:
 - where the goods are free of customs duty, or
 - where the goods are dutiable otherwise than by reference to weight or value, or
 - where the weight of the containers and packing materials is not to be included in the dutiable weight of the goods.
2. Where containers and packing materials covered by the provisions of paragraph 1(a) and (b) contain or are presented with goods of several different tariff descriptions, the weight and value of the containers and packing materials shall, for the purpose of determining their dutiable weight or value, be apportioned among all the goods contained, in proportion to the weight or value of those goods.

F. Favourable tariff treatment by reason of the nature of the goods

1. Under certain conditions, favourable tariff treatment by reason of the nature of the goods is provided for:
 - goods unfit for consumption,
 - seeds,
 - bolting cloth, not made up,
 - certain types of fresh table grapes, tobacco and nitrate.

These goods are covered by subheadings ⁽¹⁾ with a footnote reference in the following terms: 'Entry under this subheading is subject to the conditions laid down in section II, paragraph F, of the preliminary provisions.' or 'This favourable tariff treatment is subject to compliance with the formalities and conditions laid down in section II, paragraph F, of the preliminary provisions'.

⁽¹⁾ The subheadings and TARIC codes concerned are: 0408 11 20, 0408 19 20, 0408 91 20, 0408 99 20, 0701 10 00, 0712 90 11, 0806 10 10, 1001 91 10, 1005 10 13, 1005 10 15, 1005 10 18, 1006 10 10, 1007 10 10, 1106 20 10, 1201 10 00, 1202 30 00, 1204 00 10, 1205 10 10, 1206 00 10, 1207 21 00, 1207 40 10, 1207 50 10, 1207 91 10, 1207 99 20, 2401 10 35, 2401 10 85, 2401 10 95, 2401 20 35, 2401 20 85, 2401 20 95, 2501 00 51, 3102 50 00 10, 3105 90 20 10, 3105 90 80 10, 3502 11 10, 3502 19 10, 3502 20 10, 3502 90 20, 5911 20 00.

2. Goods unfit for consumption for which favourable tariff treatment is granted by reason of their nature are listed in Annex 8 by reference to the heading under which they are classified together with the description and the quantities of the denaturants used. Such goods are presumed to be unfit for consumption when the goods to be denatured and the denaturants are homogeneously mixed and their separation is economically not viable.
3. The goods listed below shall be classified in the appropriate headings for seed or for sowing, provided that the goods comply with the relevant provisions of the European Union:
 - for sweetcorn, spelt, hybrid maize, rice and sorghum (Council Directive 66/402/EEC ⁽¹⁾),
 - for seed potatoes (Council Directive 2002/56/EC of 13 June 2002 ⁽²⁾),
 - for oil seeds and oleaginous fruits (Council Directive 2002/57/EC of 13 June 2002 ⁽³⁾).

When hybrid sweetcorn, spelt, hybrid maize, rice, hybrid sorghum or oil seeds and oleaginous fruits are of a kind to which the agricultural provisions do not apply, favourable tariff treatment by reason of their nature shall be granted, provided that it is established that the goods are actually intended for sowing.

4. Bolting cloth, not made up, is granted favourable tariff treatment on the condition that the goods are indelibly marked in a way identifying them as being intended for bolting or similar industrial purposes.
5. Fresh table grapes, tobacco and nitrate are granted favourable tariff treatment on production of a duly endorsed certificate. The particular provisions to be applied and the model of the certificates are set out at Annex 9.

CHAPTER 84

NUCLEAR REACTORS, BOILERS, MACHINERY AND MECHANICAL APPLIANCES; PARTS THEREOF

Notes

1. This chapter does not cover:
 - (a) millstones, grindstones or other articles of Chapter 68;
 - (b) machinery or appliances (for example, pumps) of ceramic material and ceramic parts of machinery or appliances of any material (Chapter 69);
 - (c) laboratory glassware (heading 7017); machinery, appliances or other articles for technical uses or parts thereof, of glass (heading 7019 or 7020);
 - (d) articles of heading 7321 or 7322 or similar articles of other base metals (Chapters 74 to 76 or 78 to 81);
 - (e) vacuum cleaners of heading 8508;
 - (f) electromechanical domestic appliances of heading 8509; digital cameras of heading 8525;
 - (g) radiators for the articles of Section XVII; or
 - (h) hand-operated mechanical floor sweepers, not motorised (heading 9603).
2. Subject to the operation of note 3 to Section XVI and subject to note 11 to this chapter, a machine or appliance which answers to a description in one or more of the headings 8401 to 8424, or heading 8486 and at the same time to a description in one or more of the headings 8425 to 8480 is to be classified under the appropriate heading of the former group or under heading 8486, as the case may be, and not the latter group.
 - (A) Heading 8419 does not, however, cover:
 - (a) germination plant, incubators or brooders (heading 8436);
 - (b) grain dampening machines (heading 8437);
 - (c) diffusing apparatus for sugar juice extraction (heading 8438);
 - (d) machinery for the heat-treatment of textile yarns, fabrics or made up textile articles (heading 8451); or
 - (e) machinery, plant or laboratory equipment, designed for a mechanical operation, in which a change of temperature, even if necessary, is subsidiary.
 - (B) Heading 8422 does not cover:
 - (a) sewing machines for closing bags or similar containers (heading 8452); or
 - (b) office machinery of heading 8472.
 - (C) Heading 8424 does not cover:
 - (a) ink-jet printing machines (heading 8443); or
 - (b) water-jet cutting machines (heading 8456).

3. A machine tool for working any material which answers to a description in heading 8456 and at the same time to a description in heading 8457, 8458, 8459, 8460, 8461, 8464 or 8465 is to be classified in heading 8456.
4. Heading 8457 applies only to machine tools for working metal, other than lathes (including turning centres), which can carry out different types of machining operations either:
 - (a) by automatic tool change from a magazine or the like in conformity with a machining programme (machining centres);
 - (b) by the automatic use, simultaneously or sequentially, of different unit heads working on a fixed position workpiece (unit construction machines, single station); or
 - (c) by the automatic transfer of the workpiece to different unit heads (multi-station transfer machines).
5. For the purposes of heading 8462, a 'slitting line' for flat products is a processing line composed of an uncoiler, a coil flattener, a slitter and a recoiler. A 'cut-to-length line' for flat products is a processing line composed of an uncoiler, a coil flattener, and a shear.
6. (A) For the purposes of heading 8471, the expression 'automatic data-processing machines' means machines, capable of
 - (1) storing the processing program or programs and at least the data immediately necessary for the execution of the program;
 - (2) being freely programmed in accordance with the requirements of the user;
 - (3) performing arithmetical computations specified by the user; and
 - (4) executing, without human intervention, a processing program which requires them to modify their execution, by logical decision during the processing run.(B) Automatic data-processing machines may be in the form of systems consisting of a variable number of separate units.
(C) Subject to paragraph (D) and (E) below, a unit is to be regarded as being a part of an automatic data-processing system if it meets all of the following conditions:
 - (1) it is of a kind solely or principally used in an automatic data-processing system;
 - (2) it is connectable to the central processing unit either directly or through one or more other units; and
 - (3) it is able to accept or deliver data in a form (codes or signals) which can be used by the system.

Separately presented units of an automatic data-processing machine are to be classified in heading 8471.

However keyboards, X-Y coordinate input devices and disk storage units which satisfy the conditions of paragraphs (C)(2) and (C)(3) above, are in all cases to be classified as units of heading 8471.

- (D) Heading 8471 does not cover the following when presented separately, even if they meet all of the conditions set forth in note 6(C) above:
 - (1) printers, copying machines, facsimile machines, whether or not combined;
 - (2) apparatus for the transmission or reception of voice, images or other data, including apparatus for communication in a wired or wireless network (such as a local or wide area network);

- (3) loudspeakers and microphones;
 - (4) television cameras, digital cameras and video camera recorders;
 - (5) monitors and projectors, not incorporating television reception apparatus.
- (E) Machines incorporating or working in conjunction with an automatic data-processing machine and performing a specific function other than data processing are to be classified in the headings appropriate to their respective functions or, failing that, in residual headings.
7. Heading 8482 applies, inter alia, to polished steel balls, the maximum and minimum diameters of which do not differ from the nominal diameter by more than 1 % or by more than 0,05 mm, whichever is less.

Other steel balls are to be classified in heading 7326.

8. A machine which is used for more than one purpose is, for the purposes of classification, to be treated as if its principal purpose were its sole purpose.

Subject to note 2 to this chapter and note 3 to Section XVI, a machine the principal purpose of which is not described in any heading or for which no one purpose is the principal purpose is, unless the context otherwise requires, to be classified in heading 8479. Heading 8479 also covers machines for making rope or cable (for example, stranding, twisting or cabling machines) from metal wire, textile yarn or any other material or from a combination of such materials.

9. For the purposes of heading 8470, the term 'pocket-size' applies only to machines the dimensions of which do not exceed 170 mm × 100 mm × 45 mm.
10. For the purposes of heading 8485, the expression 'additive manufacturing' (also referred to as 3D printing) means the formation of physical objects, based on a digital model, by the successive addition and layering, and consolidation and solidification, of material (for example, metal, plastics or ceramics).

Subject to note 1 to Section XVI and note 1 to Chapter 84, machines answering to the description in heading 8485 are to be classified in that heading and in no other heading of the nomenclature.

11. (A) Notes 12(a) and 12(b) to Chapter 85 also apply with respect to the expressions 'semiconductor devices' and 'electronic integrated circuits', respectively, as used in this note and in heading 8486. However, for the purposes of this note and of heading 8486, the expression 'semiconductor devices' also covers photosensitive semiconductor devices and light-emitting diodes (LED).
- (B) For the purposes of this note and of heading 8486, the expression 'manufacture of flat panel displays' covers the fabrication of substrates into a flat panel. It does not cover the manufacture of glass or the assembly of printed circuit boards or other electronic components onto the flat panel. The expression 'flat panel display' does not cover cathode-ray tube technology.
- (C) Heading 8486 also includes machines and apparatus solely or principally of a kind used for:
- (1) the manufacture or repair of masks and reticles;
 - (2) assembling semiconductor devices or electronic integrated circuits;
 - (3) lifting, handling, loading or unloading of boules, wafers, semiconductor devices, electronic integrated circuits and flat panel displays.
- (D) Subject to note 1 to Section XVI and note 1 to Chapter 84, machines and apparatus answering to the description in heading 8486 are to be classified in that heading and in no other heading of the nomenclature.

Subheading notes

1. For the purposes of subheading 8465 20, the term 'machining centres' applies only to machine-tools for working wood, cork, bone, hard rubber, hard plastics or similar hard materials, which can carry out different types of machining operations by automatic tool change from a magazine or the like in conformity with a machining programme.
2. For the purposes of subheading 8471 49, the term 'systems' means automatic data-processing machines whose units satisfy the conditions laid down in note 6(C) to Chapter 84 and which comprise at least a central processing unit, one input unit (for example, a keyboard or a scanner), and one output unit (for example, a visual display unit or a printer).
3. For the purposes of subheading 8481 20, the expression 'valves for oleohydraulic or pneumatic transmissions' means valves which are used specifically in the transmission of 'fluid power' in a hydraulic or pneumatic system, where the energy source is supplied in the form of pressurized fluids (liquid or gas). These valves may be of any type (for example, pressure-reducing type, check type). Subheading 8481 20 takes precedence over all other subheadings of heading 8481.
4. Subheading 8482 40 applies only to bearings with cylindrical rollers of a uniform diameter not exceeding 5 mm and having a length which is at least three times the diameter. The ends of the rollers may be rounded.

Additional notes

1. For the purposes of subheadings 8407 10 and 8409 10, the expression 'aircraft engines' shall apply only to engines designed for fitting with an airscrew or rotor.
2. Subheading 8471 70 30 shall also apply to CD-ROM drives, being storage units for automatic data-processing machines, which consist of drive units designed for retrieving the signals from CD-ROMs, audio CDs and photo CDs and equipped with a jack for earphones, a volume-control button or a start/stop button.

CHAPTER 85

ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES**Notes**

1. This chapter does not cover:
 - (a) electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed articles worn on or about the person;
 - (b) articles of glass of heading 7011;
 - (c) machines and apparatus of heading 8486;
 - (d) vacuum apparatus of a kind used in medical, surgical, dental or veterinary science (heading 9018); or
 - (e) electrically heated furniture of Chapter 94.
2. Headings 8501 to 8504 do not apply to goods described in heading 8511, 8512, 8540, 8541 or 8542.

However, metal tank mercury arc rectifiers remain classified in heading 8504.

3. For the purposes of heading 8507, the expression 'electric accumulators' includes those presented with ancillary components which contribute to the accumulator's function of storing and supplying energy or protect it from damage, such as electrical connectors, temperature control devices (e.g., thermistors) and circuit protection devices. They may also include a portion of the protective housing of the goods in which they are to be used.
4. Heading 8509 covers only the following electromechanical machines of the kind commonly used for domestic purposes:
 - (a) floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any weight;
 - (b) other machines provided the weight of such machines does not exceed 20 kg. The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading 8414), centrifugal clothes-dryers (heading 8421), dishwashing machines (heading 8422), household washing machines (heading 8450), roller or other ironing machines (heading 8420 or 8451), sewing machines (heading 8452), electric scissors (heading 8467) or to electrothermic appliances (heading 8516).
5. For the purposes of heading 8517, the term 'smartphones' means telephones for cellular networks, equipped with a mobile operating system designed to perform the functions of an automatic data processing machine such as downloading and running multiple applications simultaneously, including third-party applications, and whether or not integrating other features such as digital cameras and navigational aid systems.
6. For the purposes of heading 8523:
 - (a) 'solid-state non-volatile storage devices' (for example, 'flash memory cards' or 'flash electronic storage cards') are storage devices with a connecting socket, comprising in the same housing one or more flash memories (for example, 'Flash E²PROM') in the form of integrated circuits mounted on a printed circuit board. They may include a controller in the form of an integrated circuit and discrete passive components, such as capacitors and resistors;
 - (b) the term 'smart cards' means cards which have embedded in them one or more electronic integrated circuits (a microprocessor, random access memory (RAM) or read-only memory (ROM)) in the form of chips. These cards may contain contacts, a magnetic stripe or an embedded antenna but do not contain any other active or passive circuit elements.

7. For the purposes of heading 8524, 'flat panel display modules' refer to devices or apparatus for the display of information, equipped at a minimum with a display screen, which are designed to be incorporated into articles of other headings prior to use. Display screens for flat panel display modules include, but are not limited to, those which are flat, curved, flexible, foldable or stretchable in form. Flat panel display modules may incorporate additional elements, including those necessary for receiving video signals and the allocation of those signals to pixels on the display. However, heading 8524 does not include display modules which are equipped with components for converting video signals (e.g., a scaler IC, decoder IC or application processor) or have otherwise assumed the character of goods of other headings.

For the classification of flat panel display modules defined in this note, heading 8524 shall take precedence over any other heading in the nomenclature.

8. For the purposes of heading 8534, 'printed circuits' are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the 'film circuit' technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).

The expression 'printed circuits' does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.

Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 8542.

9. For the purpose of heading 8536, 'connectors for optical fibres, optical-fibre bundles or cables' means connectors that simply mechanically align optical fibres end to end in a digital line system. They perform no other function, such as the amplification, regeneration or modification of a signal.
10. Heading 8537 does not include cordless infrared devices for the remote control of television receivers or other electrical equipment (heading 8543).
11. For the purposes of heading 8539, the expression 'light-emitting diode (LED) light sources' covers:
- (a) 'light-emitting diode (LED) modules' which are electrical light sources based on light-emitting diodes (LED) arranged in electrical circuits and containing further elements like electrical, mechanical, thermal or optical elements. They also contain discrete active elements, discrete passive elements, or articles of heading 8536 or 8542 for the purposes of providing power supply or power control. Light-emitting diode (LED) modules do not have a cap designed to allow easy installation or replacement in a luminaire and ensure mechanical and electrical contact;
 - (b) 'light-emitting diode (LED) lamps' which are electrical light sources containing one or more LED modules containing further elements like electrical, mechanical, thermal or optical elements. The distinction between light-emitting diode (LED) modules and light-emitting diode (LED) lamps is that lamps have a cap designed to allow easy installation or replacement in a luminaire and ensure mechanical and electrical contact.

12. For the purposes of headings 8541 and 8542:

- (a) (i) 'Semiconductor devices' are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field or semiconductor-based transducers.

Semiconductor devices may also include assembly of plural elements, whether or not equipped with active and passive device ancillary functions.

'Semiconductor-based transducers' are, for the purposes of this definition, semiconductor-based sensors, semiconductor-based actuators, semiconductor-based resonators and semiconductor-based oscillators, which are types of discrete semiconductor-based devices, which perform an intrinsic function, which are able to convert any kind of physical or chemical phenomena or an action into an electrical signal or an electrical signal into any type of physical phenomenon or an action.

All the elements in semiconductor-based transducers are indivisibly combined, and may also include necessary materials indivisibly attached, that enable their construction or function.

The following expressions mean:

- (1) 'Semiconductor-based' means built or manufactured on a semiconductor substrate or made of semiconductor materials, manufactured by semiconductor technology, in which the semiconductor substrate or material plays a critical and unreplaceable role of transducer function and performance, and the operation of which is based on semiconductor properties including physical, electrical, chemical and optical properties.
 - (2) 'Physical or chemical phenomena' relate to phenomena, such as pressure, acoustic waves, acceleration, vibration, movement, orientation, strain, magnetic field strength, electric field strength, light, radioactivity, humidity, flow, chemicals concentration, etc.
 - (3) 'Semiconductor-based sensor' is a type of semiconductor device, which consists of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of detecting physical or chemical quantities and converting these into electric signals caused by resulting variations in electric properties or displacement of a mechanical structure.
 - (4) 'Semiconductor-based actuator' is a type of semiconductor device, which consists of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of converting electric signals into physical movement.
 - (5) 'Semiconductor-based resonator' is a type of semiconductor device, which consists of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures in response to an external input.
 - (6) 'Semiconductor-based oscillator' is a type of semiconductor device, which consists of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures.
- (ii) 'Light-emitting diodes (LED)' are semiconductor devices based on semiconductor materials which convert electrical energy into visible, infra-red or ultra-violet rays, whether or not electrically connected among each other and whether or not combined with protective diodes.

Light-emitting diodes (LED) of heading 8541 do not incorporate elements for the purposes of providing power supply or power control;

(b) 'Electronic integrated circuits' are:

- (1) monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, inductances, etc.) are created in the mass (essentially) and on the surface of a semiconductor or compound semiconductor material (for example, doped silicon, gallium arsenide, silicon germanium, indium phosphide) and are inseparably associated;
- (2) hybrid integrated circuits in which passive elements (resistors, capacitors, inductances, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, by interconnections or interconnecting cables, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;
- (3) multichip integrated circuits consisting of two or more interconnected monolithic integrated circuits combined to all intents and purposes indivisibly, whether or not on one or more insulating substrates, with or without leadframes, but with no other active or passive circuit elements;

- (4) multi-component integrated circuits (MCOs) : a combination of one or more monolithic, hybrid, or multi-chip integrated circuits with at least one of the following components : silicon-based sensors, actuators, oscillators, resonators or combinations thereof, or components performing the functions of articles classifiable under heading 8532, 8533, 8541, or inductors classifiable under heading 8504, formed to all intents and purposes indivisibly into a single body like an integrated circuit, as a component of a kind used for assembly onto a printed circuit board (PCB) or other carrier, through the connecting of pins, leads, balls, lands, bumps, or pads.

For the purpose of this definition :

- (1) 'Components' may be discrete, manufactured independently then assembled onto the rest of the MCO, or integrated into other components.
- (2) 'Silicon based' means built on a silicon substrate, or made of silicon materials, or manufactured onto integrated circuit die.
- (3)
 - (a) 'Silicon based sensors' consist of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of detecting physical or chemical phenomena and transducing these into electric signals, caused by resulting variations in electric properties or displacement of a mechanical structure. 'Physical or chemical phenomena' relates to phenomena, such as pressure, acoustic waves, acceleration, vibration, movement, orientation, strain, magnetic field strength, electric field strength, light, radioactivity, humidity, flow, chemicals concentration, etc.
 - (b) 'Silicon based actuators' consist of microelectronic and mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of converting electrical signals into physical movement.
 - (c) 'Silicon based resonators' are components that consist of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures in response to an external input.
 - (d) 'Silicon based oscillators' are active components that consist of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures.

For the classification of the articles defined in this note, headings 8541 and 8542 shall take precedence over any other heading in the nomenclature, except in the case of heading 8523, which might cover them by reference to, in particular, their function.

Subheading notes

1. Subheading 8525 81 covers only high-speed television cameras, digital cameras and video camera recorders having one or more of the following characteristics:
 - writing speed exceeding 0,5 mm per microsecond;
 - time resolution 50 nanoseconds or less;
 - frame rate exceeding 225 000 frames per second.
2. In respect of subheading 8525 82, radiation-hardened or radiation-tolerant television cameras, digital cameras and video camera recorders are designed or shielded to enable operation in a high-radiation environment. These cameras are designed to withstand a total radiation dose of at least 50×10^3 Gy(silicon) (5×10^6 RAD (silicon)), without operational degradation.
3. Subheading 8525 83 covers night vision television cameras, digital cameras and video camera recorders which use a photocathode to convert available light to electrons, which can be amplified and converted to yield a visible image. This subheading excludes thermal imaging cameras (generally subheading 8525 89).

4. Subheading 8527 12 covers only cassette-players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm × 100 mm × 45 mm.
5. For the purposes of subheadings 8549 11 to 8549 19, 'spent primary cells, spent primary batteries and spent electric accumulators' are those which are neither usable as such because of breakage, cutting-up, wear or other reasons, nor capable of being recharged.

Additional note

1. Subheadings 8519 20 10 and 8519 30 00 are to be taken not to apply to sound reproducing apparatus with laser reading system.

SECTION XVII

VEHICLES, AIRCRAFT, VESSELS AND ASSOCIATED TRANSPORT EQUIPMENT

Notes

1. This section does not cover articles of heading 9503 or 9508, or bobsleighs, toboggans or the like of heading 9506.
2. The expressions 'parts' and 'parts and accessories' do not apply to the following articles, whether or not they are identifiable as for the goods of this section:
 - (a) joints, washers and the like of any material (classified according to their constituent material or in heading 8484) or other articles of vulcanised rubber other than hard rubber (heading 4016);
 - (b) parts of general use, as defined in note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39);
 - (c) articles of Chapter 82 (tools);
 - (d) articles of heading 8306;
 - (e) machines or apparatus of headings 8401 to 8479, or parts thereof, other than the radiators for the articles of this Section; articles of heading 8481 or 8482 or, provided they constitute integral parts of engines or motors, articles of heading 8483;
 - (f) electrical machinery or equipment (Chapter 85);
 - (g) articles of Chapter 90;
 - (h) articles of Chapter 91;
 - (ij) arms (Chapter 93);
 - (k) luminaires and lighting fittings and parts thereof of heading 9405;
 - (l) brushes of a kind used as parts of vehicles (heading 9603).
3. References in Chapters 86 to 88 to 'parts' or 'accessories' do not apply to parts or accessories which are not suitable for use solely or principally with the articles of those chapters. A part or accessory which answers to a description in two or more of the headings of those chapters is to be classified under that heading which corresponds to the principal use of that part or accessory.
4. For the purposes of this section:
 - (a) vehicles specially constructed to travel on both road and rail are classified under the appropriate heading of Chapter 87;
 - (b) amphibious motor vehicles are classified under the appropriate heading of Chapter 87;
 - (c) aircraft specially constructed so that they can also be used as road vehicles are classified under the appropriate heading of Chapter 88.

5. Air-cushion vehicles are to be classified in this section with the vehicles to which they are most akin as follows:
- (a) in Chapter 86 if designed to travel on a guide-track (hovertrains);
 - (b) in Chapter 87 if designed to travel over land or over both land and water;
 - (c) in Chapter 89 if designed to travel over water, whether or not able to land on beaches or landing stages or also able to travel over ice.

Parts and accessories of air-cushion vehicles are to be classified in the same way as those of vehicles of the heading in which the air-cushion vehicles are classified under the above provisions.

Hovertrain track fixtures and fittings are to be classified as railway track fixtures and fittings, and signalling, safety or traffic control equipment for hovertrain transport systems as signalling, safety or traffic control equipment for railways.

Additional notes

- 1. *Subject to the provisions of additional note 3 to Chapter 89, tools and articles necessary for the maintenance or repair of vehicles, aircraft or vessels are to be classified with those vehicles, aircraft or vessels if presented with them. Other accessories presented with vehicles, aircraft or vessels are also to be classified therewith, if they form part of the normal equipment of the vehicles, aircraft or vessels and are normally sold with them.*
- 2. *The provisions of general rule 2(a) are also applicable, at the request of the declarant and subject to conditions stipulated by the competent authorities, to goods of headings 8608, 8805, 8905 and 8907 imported in split consignments.*

CHAPTER 86

RAILWAY OR TRAMWAY LOCOMOTIVES, ROLLING STOCK AND PARTS THEREOF; RAILWAY OR TRAMWAY TRACK FIXTURES AND FITTINGS AND PARTS THEREOF; MECHANICAL (INCLUDING ELECTROMECHANICAL) TRAFFIC SIGNALLING EQUIPMENT OF ALL KINDS

Notes

- 1. This chapter does not cover:
 - (a) railway or tramway sleepers of wood or of concrete, or concrete guide-track sections for hovertrains (heading 4406 or 6810);
 - (b) railway or tramway track construction material of iron or steel of heading 7302; or
 - (c) electrical signalling, safety or traffic control equipment of heading 8530.
- 2. Heading 8607 applies, inter alia, to:
 - (a) axles, wheels, wheel sets (running gear), metal tyres, hoops and hubs and other parts of wheels;
 - (b) frames, underframes, bogies and bissel-bogies;
 - (c) axle-boxes; brake gear;
 - (d) buffers for rolling-stock; hooks and other coupling gear and corridor connections;
 - (e) coachwork.

CHAPTER 87

VEHICLES OTHER THAN RAILWAY OR TRAMWAY ROLLING STOCK, AND PARTS AND ACCESSORIES THEREOF

Notes

1. This chapter does not cover railway or tramway rolling stock designed solely for running on rails.
2. For the purposes of this chapter, 'tractors' means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilisers or other goods.

Machines and working tools designed for fitting to tractors of heading 8701 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.

3. Motor chassis fitted with cabs fall in headings 8702 to 8704, and not in heading 8706.
4. Heading 8712 includes all children's bicycles. Other children's cycles fall in heading 9503.

Subheading note

1. Subheading 8708 22 covers:
 - (a) front windscreens (windshields), rear windows and other windows, framed; and
 - (b) front windscreens (windshields), rear windows and other windows, whether or not framed, incorporating heating devices or other electrical or electronic devices,

when suitable for use solely or principally with the motor vehicles of headings 8701 to 8705.

CHAPTER 88

AIRCRAFT, SPACECRAFT, AND PARTS THEREOF

Note

1. For the purposes of this chapter, the expression ‘unmanned aircraft’ means any aircraft, other than those of heading 8801, designed to be flown without a pilot on board. They may be designed to carry a payload or equipped with permanently integrated digital cameras or other equipment which would enable them to perform utilitarian functions during their flight.

The expression ‘unmanned aircraft’, however, does not cover flying toys, designed solely for amusement purposes (heading 9503).

Subheading notes

1. For the purposes of subheadings 8802 11 to 8802 40, the expression ‘unladen weight’ means the weight of the machine in normal flying order, excluding the weight of the crew and of fuel and equipment other than permanently fitted items of equipment.
2. For the purposes of subheadings 8806 21 to 8806 24 and 8806 91 to 8806 94, the expression ‘maximum take-off weight’ means the maximum weight of the machine in normal flying order, at take-off, including the weight of payload, equipment and fuel.

SECTION XVIII

OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; CLOCKS AND WATCHES; MUSICAL INSTRUMENTS; PARTS AND ACCESSORIES THEREOF

CHAPTER 90

OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; PARTS AND ACCESSORIES THEREOF**Notes**

1. This chapter does not cover:

- (a) articles of a kind used in machines, appliances or for other technical uses, of vulcanised rubber other than hard rubber (heading 4016), of leather or of composition leather (heading 4205) or of textile material (heading 5911);
- (b) supporting belts or other support articles of textile material, whose intended effect on the organ to be supported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (Section XI);
- (c) refractory goods of heading 6903; ceramic wares for laboratory, chemical or other technical uses, of heading 6909;
- (d) glass mirrors, not optically worked, of heading 7009, or mirrors of base metal or of precious metal, not being optical elements (heading 8306 or Chapter 71);
- (e) goods of heading 7007, 7008, 7011, 7014, 7015 or 7017;
- (f) parts of general use, as defined in note 2 to Section XV, of base metal (Section XV) or similar goods of plastics (Chapter 39); however, articles specially designed for use exclusively in implants in medical, surgical, dental or veterinary sciences are to be classified in heading 9021;
- (g) pumps incorporating measuring devices, of heading 8413; weight-operated counting and checking machinery, or separately presented weights for balances (heading 8423); lifting or handling machinery (headings 8425 to 8428); paper or paperboard cutting machines of all kinds (heading 8441); fittings for adjusting work or tools on machine tools or water-jet cutting machines, of heading 8466, including fittings with optical devices for reading the scale (for example, optical dividing heads) but not those which are in themselves essentially optical instruments (for example, alignment telescopes); calculating machines (heading 8470); valves and other appliances of heading 8481; machines and apparatus (including apparatus for the projection or drawing of circuit patterns on sensitised semiconductor materials) of heading 8486;
- (h) searchlights or spotlights of a kind used for cycles or motor vehicles (heading 8512); portable electric lamps of heading 8513; cinematographic sound recording, reproducing or re-recording apparatus (heading 8519); sound-heads (heading 8522); television cameras, digital cameras and video camera recorders (heading 8525); radar apparatus, radio navigational aid apparatus or radio remote control apparatus (heading 8526); connectors for optical fibres, optical fibre bundles or cables (heading 8536); numerical control apparatus of heading 8537; sealed beam lamp units of heading 8539; optical fibre cables of heading 8544;

- (j) searchlights or spotlights of heading 9405;
 - (k) articles of Chapter 95;
 - (l) monopods, bipods, tripods and similar articles, of heading 9620;
 - (m) capacity measures, which are to be classified according to their constituent material; or
 - (n) spools, reels or similar supports (which are to be classified according to their constituent material, for example, in heading 3923 or Section XV).
2. Subject to note 1 above, parts and accessories for machines, apparatus, instruments or articles of this chapter are to be classified according to the following rules:
- (a) Parts and accessories which are goods included in any of the headings of this chapter or of Chapter 84, 85 or 91 (other than heading 8487, 8548 or 9033) are in all cases to be classified in their respective headings.
 - (b) Other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus, or with a number of machines, instruments or apparatus of the same heading (including a machine, instrument or apparatus of heading 9010, 9013 or 9031) are to be classified with the machines, instruments or apparatus of that kind.
 - (c) All other parts and accessories are to be classified in heading 9033.
3. The provisions of notes 3 and 4 to Section XVI apply also to this chapter.
4. Heading 9005 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for machines, appliances, instruments or apparatus of this chapter or Section XVI; such telescopic sights and telescopes are to be classified in heading 9013.
5. Measuring or checking optical instruments, appliances or machines which, but for this note, could be classified both in heading 9013 and in heading 9031 are to be classified in heading 9031.
6. For the purposes of heading 9021, the expression 'orthopaedic appliances' means appliances for:
- preventing or correcting bodily deformities; or
 - supporting or holding parts of the body following an illness, operation or injury.
- Orthopaedic appliances include footwear and special insoles designed to correct orthopaedic conditions, provided that they are either (1) made to measure or (2) mass-produced, presented singly and not in pairs and designed to fit either foot equally.
7. Heading 9032 applies only to:
- (a) instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilised against disturbances, by constantly or periodically measuring its actual value; and
 - (b) automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilised against disturbances, by constantly or periodically measuring its actual value.

Additional notes

1. For the purposes of subheadings 9015 30 10, 9025 80 40, 9026 10 21, 9026 10 29, 9026 20 20, 9026 80 20, 9027 10 10 and 9032 10 20, the expression 'electronic' means instruments and apparatus which incorporate one or more articles of heading 8540, 8541 or 8542 but for the purposes of the foregoing, no account shall be taken of articles of heading 8540, 8541 or 8542 which have solely the function of rectifying current or which are included in the power pack of instruments or apparatus.
2. For the purposes of subheading 9021 10 10, the expression "orthopaedic appliances" means appliances which are specially designed for a particular orthopaedic purpose, in distinction to products that might be used for various purposes (for example, products for overstrained joints, ligaments or tendons caused by sporting activities, type writing, and products which simply alleviate pain in the defective or disabled part of the body, for example, caused by inflammation).

The "orthopaedic appliances" must completely prevent a specific movement of the defective or disabled part of the body (for example, joints, ligaments, tendons) in order to exclude further injuries or bodily deformities or an aggravation of such injuries or deformities, as distinct from other products that cannot prevent specific movements, yet prevent reflex movements (movements carried out subconsciously) through the relative inflexibility of those products due to, for example, flexible splints, pressure pads, non-elastic textile material, restrictions through "Velcro-type" straps.

CHAPTER 91

CLOCKS AND WATCHES AND PARTS THEREOF

Notes

1. This chapter does not cover:
 - (a) clock or watch glasses or weights (classified according to their constituent material);
 - (b) watch chains (heading 7113 or 7117, as the case may be);
 - (c) parts of general use defined in note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading 7115); clock or watch springs are, however, to be classified as clock or watch parts (heading 9114);
 - (d) bearing balls (heading 7326 or 8482, as the case may be);
 - (e) articles of heading 8412 constructed to work without an escapement;
 - (f) ball bearings (heading 8482); or
 - (g) articles of Chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (Chapter 85).
2. Heading 9101 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semi-precious stones (natural, synthetic or reconstructed) of headings 7101 to 7104. Watches with case of base metal inlaid with precious metal fall in heading 9102.
3. For the purposes of this chapter, the expression 'watch movements' means devices regulated by a balance-wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.
4. Except as provided in note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this chapter.

3827 68 00 10	--- R452B (containing 67 % of difluoromethane (HFC-32), 26 % of 2,3,3,3-tetrafluoropropene (HFC-1234yf) and 7 % of pentafluoroethane (HFC-125))	t. CO ₂
3827 68 00 20	--- R455A (containing 75,5 % of 2,3,3,3-tetrafluoropropene (HFC-1234yf), 21,5 % of difluoromethane (HFC-32) and 3 % of carbon dioxide)	t. CO ₂
3827 68 00 30	--- Containing only 1,1,1,3,3-pentafluorobutane (HFC-365mfc) and 1,1,1,2,3,3,3-heptafluoropropane (HFC-227ea)	t. CO ₂
3827 68 00 40	--- Containing only 1,1,1,3,3-pentafluorobutane (HFC-365mfc) and 1,1,1,3,3-pentafluoropropane (HFC-245fa)	t. CO ₂
3827 68 00 50	--- R450A (containing 58 % of 1,3,3,3-tetrafluoropropene (HFC-1234ze) and 42 % of 1,1,1,2-tetrafluoroethane (HFC-134a))	t. CO ₂
3827 68 00 60	--- R513A (containing 56 % of 2,3,3,3-tetrafluoropropene (HFC-1234yf) and 44 % of 1,1,1,2-tetrafluoroethane (HFC-134a))	t. CO ₂
3827 68 00 90	--- Other	t. CO ₂

	---- Protective face masks	
6307 90 93	----- Filtering facepieces (FFP) according to EN149; other masks conforming to a similar standard for masks as respiratory protective devices to protect against particles ----- Nonwovens ----- Filtering facepieces FFP2 and FFP3 according to EN149 and similar masks

8415 10	– Of a kind designed to be fixed to a window, wall, ceiling or floor, self-contained or ‘split-system’	
8415 10 10	-- Self-contained	
8415 10 10 10	--- Pre-charged with hydrofluorocarbons (HFCs)	t. CO ₂
8415 10 90	-- Split-system	
8415 10 90 10	--- Pre-charged with hydrofluorocarbons (HFCs)	t. CO ₂
8415 20 00	– Of a kind used for persons, in motor vehicles	
8415 20 00 10	-- Pre-charged with hydrofluorocarbons (HFCs)	t. CO ₂
	– Other	
8415 81 00	– – Incorporating a refrigerating unit and a valve for reversal of the cooling/heat cycle (reversible heat pumps)	
	--- Other (than for use in civil aircraft)	
8415 81 00 91	--- Pre-charged with hydrofluorocarbons (HFCs)	t. CO ₂
8415 82 00	– – Other, incorporating a refrigerating unit	
	--- Other (than for use in civil aircraft)	
8415 82 00 91	--- Pre-charged with hydrofluorocarbons (HFCs)	t. CO ₂
8415 90 00	– Parts
